FOR IMMEDIATE RELEASE

SATELLITE BEACH CITY HALL PRINTS THREATENING LETTER

SATELLITE BEACH, FL – Just before Christmas last year a scary packet featuring 11 pages of incoherent rambling peppered with creepy imagery (including bloody hands pressed against fogged glass) was sent to a friend and colleague of mine, Jeff Dubitsky. This packet was brought up numerous times at city council since then after public records indicated that another resident compiled and sent the documents to city hall for printing. None of the city council, the mayor, nor the city manager herself seem willing to address the concerns surrounding this. I don't think shrugging this off is okay, and I've compiled a video detailing the origins of the documents in this packet, the turmoil faced by those affected, and the lack of even any acknowledgment that a problem exists. I've taken it upon myself to prove beyond a shadow of a doubt that the document that was sent to Jeff's family originated from the Lanier LD 645C multi-function color laser printer/copier in the file room at city hall. I hope that this raises the alarm and stops this kind of thing from ever happening again. Especially not to one of the nicest families I know. Is his family the only one? Or have their been others?

Below is a link to the premiere of my nine minute video on this topic being released at 7pm this evening.

[Embed or include a link to a video or other multimedia related to your piece of news.]

It's time to bring transparency and accountability back to Satellite Beach.
